DECLARATION FOR CONTINUATION OF
REISSUE PATENT APPLICATION

The Assistant Commissioner
for Patents
Washington, DC 20231

Sir:

As a below named inventor of U.S. Patent No. 5,414,662, I hereby declare that:

1. My residence, post office address and citizenship are stated below next to my name.
2. I believe that the named inventors are the original and first inventors of the claimed subject matter described in United States Patent No. 5,414,662 granted

on May 9, 1995 (hereinafter the '662 patent) entitled DYNAMIC RANDOM ACCESS MEMORY USING IMPERFECT ISOLATING TRANSISTORS for which a reissue patent is sought.

3. I have reviewed and I understand the contents of the application, including the claims, which was filed on December 21, 2000 as U.S. Application No. 10/032,431.
4. I hereby claim the benefit under 35 U.S.C. 120 of any United States application(s), or 365(c) of any PCT international application designating the United States of America, listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States or PCT International application in the manner provided by the first paragraph of 35 U.S.C. 112, I acknowledge the duty to disclose information known by me to be material to patentability as defined in 37 C.F.R. 1.56 which became available between the filing date of the prior application and the national or PCT international filing date of this application:

(Application Serial No.)	(Filing date)	(Status: patented, pending, abandoned)
<u>08/853,507</u>	<u>May 8, 1997</u>	<u>Pending (Allowed)</u>

5. I acknowledge the duty to disclose information that is known by me to be material to patentability as defined in 37 C.F.R. § 1.56.
6. I believe the '662 patent to be wholly or partially inoperative or invalid by reason of claiming, without any deceptive intention, more than we had the right to claim in the patent in one respect and less than we had the right to claim in the patent in another respect.
7. One error being relied upon as a basis for reissue is that the original claims 1-17 failed to claim an embodiment in which the high voltage supply V_{pp} voltage, which is higher than V_{DD} , is used to fully switch on bit line isolation during a restore portion of a read operation, as disclosed in the original '662 patent at column 5, lines 63-68, rather than providing a voltage through a

capacitive boosting operation.

8. All errors being corrected in the reissue application, including all amendments up to the time of and with the filing of this Declaration, arose without any deceptive intention on the part of the applicants.
9. I hereby declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of the application or any patent issued thereon.
